Observer Tendering Regulatory Amendment - Council motion

June 5, 2014

The Council requests NMFS to evaluate and report back on tendering data for the first part of 2014 before prioritizing this package relative to other proposed observer program regulatory amendments.

The Council supports moving Alternative 2, Option 2, the option to allow observers to monitor trawl offloads at the tender to census salmon, be removed from this amendment package, and considered as part of the GOA trawl bycatch management package.
