I. High Seas Drift Net (HSDN) Enforcement

USCGC MELLON began patrolling the North Pacific Anadromous Fish Commission (NPAFC) Convention Area on 17 April completing her patrol on 20 July. The intent of the patrol was to detect and deter illegal, unreported, and unregulated (IUU) fishing activity on the high seas in cooperation with North Pacific nations. CGC MELLON identified 200 foreign fishing and support vessels operating on the high seas of the North Pacific during their patrol of the NPAFC Convention Area. CGC MELLON conducted five Western and Central Pacific Fisheries Commission (WCPFC) boardings in June, all on Taiwan registered fishing vessels. Four of the vessels were found to be in compliance with WCPFC conservation and management measures (CMM). One vessel had a violation of CMM 2012-07 - Mitigating Impact of Fishing Gear on Seabirds. F/V LIAN HER FA failed to employ physical mitigation measures while fishing with a longline. Taiwan fisheries authorities were notified and the vessel's high seas permit was suspended for one month as a result.

In support of CGC MELLON, a Coast Guard HC-130 conducted two deployments staged out of the U.S. air bases in Misawa and Yokota Japan. A total of nine surveillance flights sighted 201 vessels operating on the high seas of the North Pacific. No suspected HSDN vessels were detected by these flights. In addition, a Canadian CP-140 aircraft deployed to Hakodate, Japan from 08-28 June. No suspected IUU or HSDN activity was detected during these flights either.

One member of the District 17 Enforcement Branch participated in the first annual North Pacific Fisheries Commission (NPFC) conference held in Tokyo, Japan from 28 August to 04 September. The member advised the U.S. delegation on enforcement and compliance matters as well as served as an NPAFC observer to the Technical and Compliance Committee of the NPFC, presenting a summary of NPAFC enforcement best practices to the various North Pacific delegations.

II. U.S./Russian Maritime Boundary Line (MBL) Enforcement

Activity along the MBL was moderate over the reporting period with an average of 16 vessels detected within 20 miles of the MBL daily. The flag states of these foreign fishing vessels (FFVs) included Russia, Korea, and China. In addition to regular surveillance, there were Coast Guard surface and aerial patrols of the MBL during this period. Notably, there have been no detected incursions by FFVs into the U.S. EEZ this season, down from 34 incursions in 2014. One U.S. fishing vessel was detected crossing into the Russian EEZ in July. This sighting information was forwarded to NOAA OLE and the Russian Border Guard.

District 17 hosted senior representatives from the Russian Border Guard Directorate's Eastern Arctic District and conducted an operational meeting in Juneau and Sitka, AK from 20-22 July. The meeting included discussions in furthering maritime safety, security, and stewardship in the Bering Sea and North Pacific Ocean with expansion of the partnership into the Arctic Ocean.

Two members of the District 17 Enforcement Branch participated in the U.S.-Russia Intergovernmental Consultative Committee on Fisheries in Portland, OR from 09-11 September. Both the D17 and Russian Border Guard exchanged presentations on cooperative enforcement efforts from the past year. Also during this meeting, the U.S. and Russia signed a bilateral

agreement to combat illegal, unreported, and unregulated (IUU) fishing. The agreement aims to improve coordination among the multiple government agencies in both countries that need to work together in order to combat IUU fishing.

III. U.S./Canadian EEZ Boundary (Dixon Entrance) Enforcement

There was light fishing activity during the reporting period along the U.S.-Canadian EEZ boundary in vicinity of Dixon Entrance. There were Coast Guard surface and aerial patrols of the border area during this period. All Canadian fishing vessels sighted were south of the A-B line and no incursions into U.S. waters were detected.

A Canadian Department of Fisheries and Oceans (DFO) enforcement vessel, CAPTAIN GODDARD, approached two U.S. vessels in the maritime area claimed by both the U.S. and Canada in late July. The vessels, one recreational and one charter vessel with passengers embarked, were targeting halibut within 1 NM of Nunez Rocks. CAPTAIN GODDARD notified the vessels they were in Canadian claimed waters and requested them to return to U.S. waters. Both vessels departed the area and reported the encounter to the U.S. Coast Guard. As a result of these reports from U.S. citizens, the U.S. Coast Guard increased patrols of the maritime area claimed by the United States in the vicinity of Dixon Entrance and engaged in dialog with appropriate regional enforcement officials from Department of Fisheries and Oceans Canada. Both sides agreed that before any further law enforcement action was taken by Canadian officials, DFO would coordinate in advance with the U.S. Coast Guard.

IV. Steller Sea Lions (SSL) and Critical Habitat Enforcement

The Coast Guard monitors more than 151 critical habitat areas around Alaska each month as part of routine cutter and aircraft patrol activity. From June to August 2015, the U.S. Coast Guard supported NOAA Office of Law Enforcement (OLE) and Office of Protected Resources marine mammal mortality investigations in the Copper River delta. Following an initial report from Alaska Department of Fish and Game of multiple SSL carcasses observed on the Copper River delta barrier islands, a MH-60 helicopter conducted four flights on June 3rd, June 5th, July 3rd, and July 28th to assist Marine Mammal Stranding Network biologists and NOAA OLE investigators.

V. Fishing Vessel Boarding Statistics

There were 433 domestic fisheries and fishing vessel safety boardings conducted by the U.S. Coast Guard during the reporting period. These boardings detected a total of 150 safety violations onboard 72 vessels and 14 federal fisheries violations onboard ten vessels. Figures 1 and 2 show the historic trends for boardings and violations.

VI. Halibut and Sablefish Enforcement

Coast Guard patrols completed 236 boardings on fishing vessels targeting halibut and sablefish during the reporting period. There were 28 boardings of IFQ halibut vessels, detecting seven fisheries violations on five vessels and 11 safety violations on six vessels. Two IFQ halibut vessels received voyage terminations for significant safety violations.

There were six boardings of IFQ sablefish vessels, detecting no fisheries violations nor safety violations, and 1 boarding on a fishing vessel targeting sablefish in state waters.

There were 62 boardings on charter vessels targeting halibut, detecting five fisheries violations on three vessels. Eight charter vessels received 13 safety violations and three voyages were terminated for significant safety violations.

There were 139 boardings on recreational vessels targeting halibut, detecting no fisheries violations and 49 safety violations on 24 vessels. Seven voyages were terminated for significant safety concerns.

VII. Crab Fisheries

The Coast Guard commenced commercial vessel safety enforcement activities involving the Bering Sea and Aleutian Islands crab fisheries following the 01 August 2015 opening of the Aleutian Islands golden king crab fishery. CGC BOUTWELL boarded three vessels targeting crab and detected no violations.

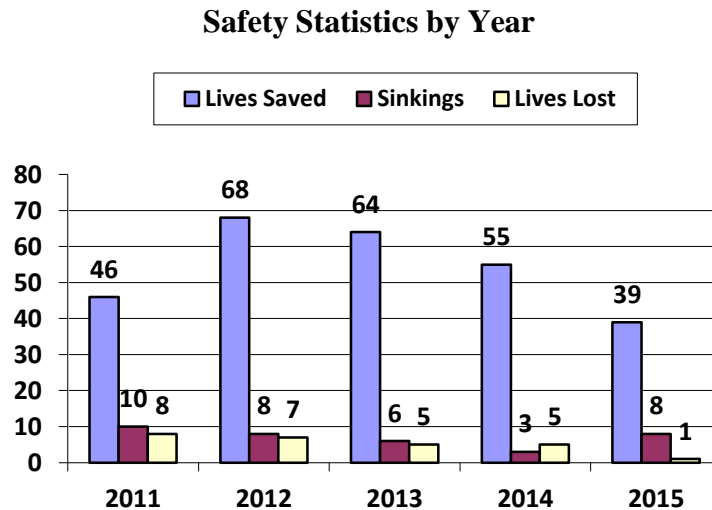

Air Station Kodiak will forward deploy an MH-60 to Cold Bay for the expected 15 October 2015 Bering Sea crab season opening.

VIII. Commercial Fishing Vessel Safety/Search and Rescue Cases

During the reporting period, 150 safety violations were detected on 72 vessels. There were six voyage terminations during the reporting period for especially hazardous conditions onboard. A comprehensive list of violations can be found in Appendix C.

There were 51 search and rescue (SAR) cases involving fishing vessels in U.S. waters, resulting in 21 lives saved, one life lost, and six vessel sinkings. Appendix A provides a comprehensive list of SAR and significant marine casualty cases involving fishing vessels over the reporting period.
