

Council Motion
Agenda Item C4: BSAI Trawl Limited Access Sector (TLAS) Yellowfin Sole Fishery
June 11, 2017

The Council recommends Alternative 2, Option 1.1, and Suboption 1.1.1 as its preferred alternative.

Alternative 2: A catcher vessel may target the BSAI TLAS yellowfin sole fishery and deliver its catch to a mothership or catcher/processor only if that catcher vessel is assigned an LLP that is credited with at least one trip target landing in the BSAI TLAS yellowfin sole fishery made to a mothership or catcher/processor between:

Option 1

Option 1.1: 2008-2015

Suboption 1.1.1: in any year

If more than one LLP license is assigned to a catcher vessel that made at least one trip target in the BSAI TLAS fishery, the vessel owner must specify only one LLP license to receive credit with the landings made by that vessel when more than one LLP license was assigned to the vessel.
