

Council Motion
Agenda Item D-3: Allocation Review Triggers
June 12, 2017

The Council identifies three non-LAPP allocations (the Halibut Catch Sharing Plan and the GOA and BSAI Cod Allocations), and LAPPs as subject to the allocation policy directive. The CDQ allocation is not subject to this review. The Council adopts the LAPP review process for LAPPs with the necessary modifications to the LAPP review recommended by staff. The Council adopts the 10-year time frame as the primary trigger criteria for review for non-LAPP allocations, and the existing Council public input process as the secondary trigger criteria for review. The Council will specify its approach to allocation review at final action for any future allocation decisions.

The Council will post this policy on its website and provide NMFS with notification.
