

# 2017 GOA skate complex

**Olav A. Ormseth  
Alaska Fisheries Science Center  
NPFMC Groundfish Plan Team meeting, November 2017**

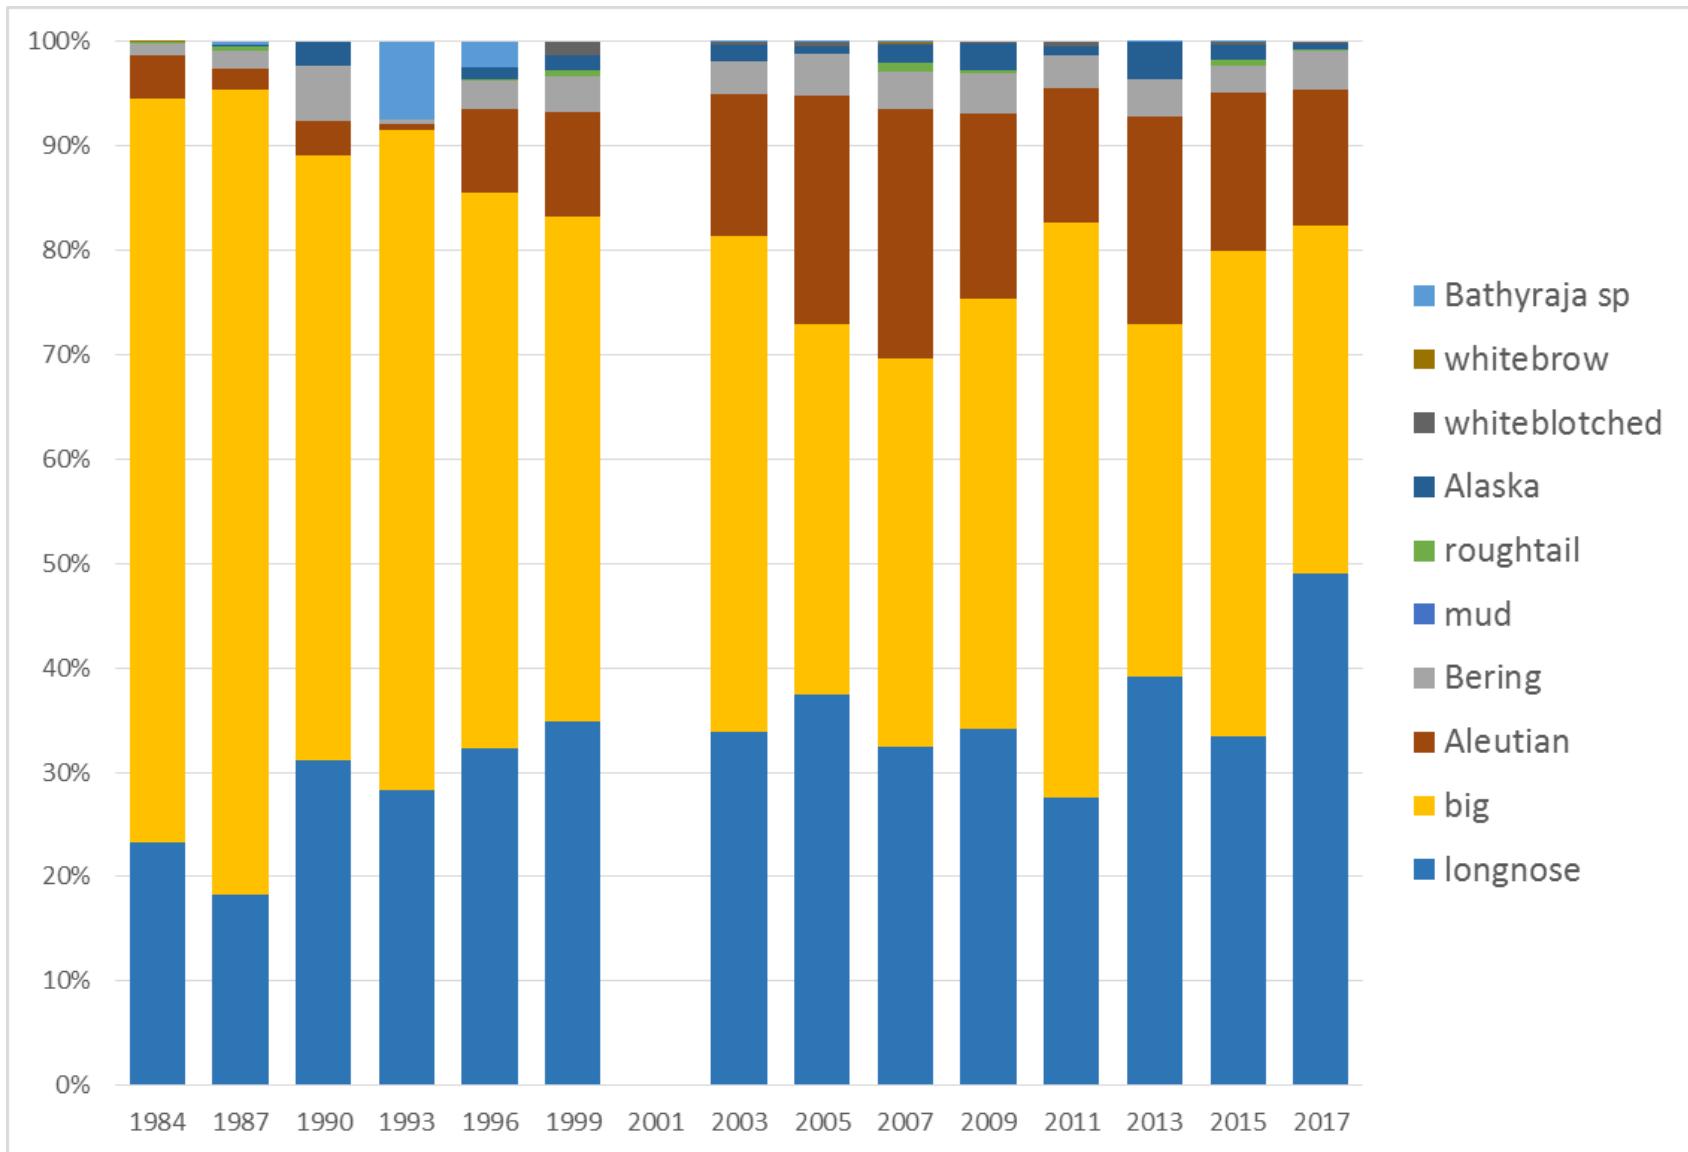

# overview

- 1) summary of results
- 2) features of the populations
- 3) status: survey results for skates
- 4) skate catch information
- 5) focus on big skate
- 6) harvest recommendations

# summary of results

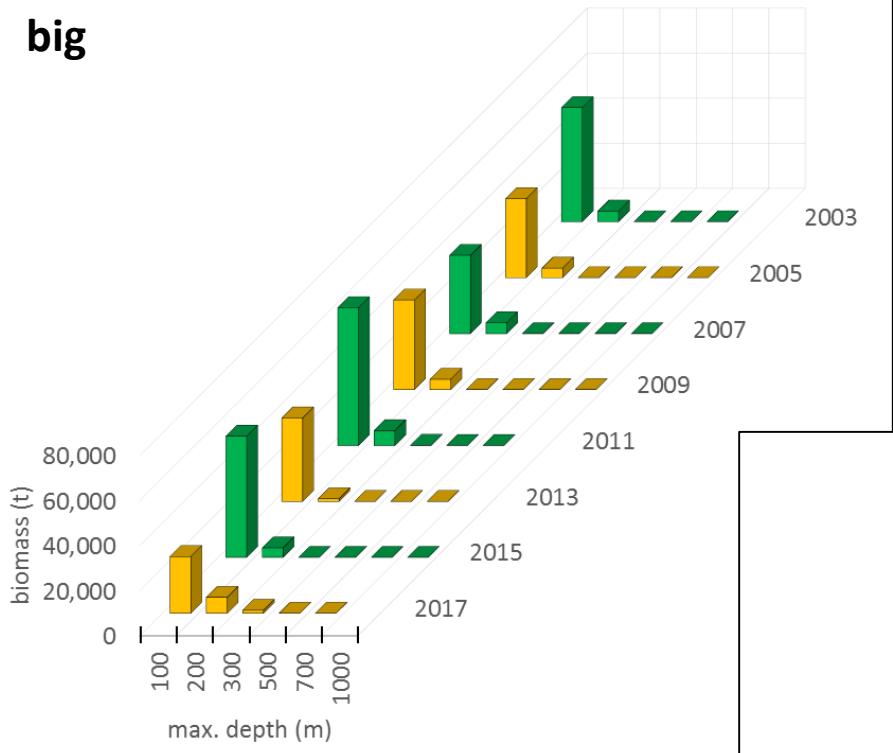

- 1) Big skate biomass declined substantially from 2015.
- 2) The 2017 longnose skate biomass increased.
- 3) The biomass of Other Skates declined.
- 4) Fewer large-sized big skates were encountered in the survey and fisheries.
- 5) More small big skates in the central GOA; fewer in the eastern GOA.
- 6) Longnose skate shifted their depth distribution to shallower water.
- 7) Big skate biomass on the eastern Bering Sea shelf is way up & it looks like these skates are from the GOA.

# GOA skate species composition

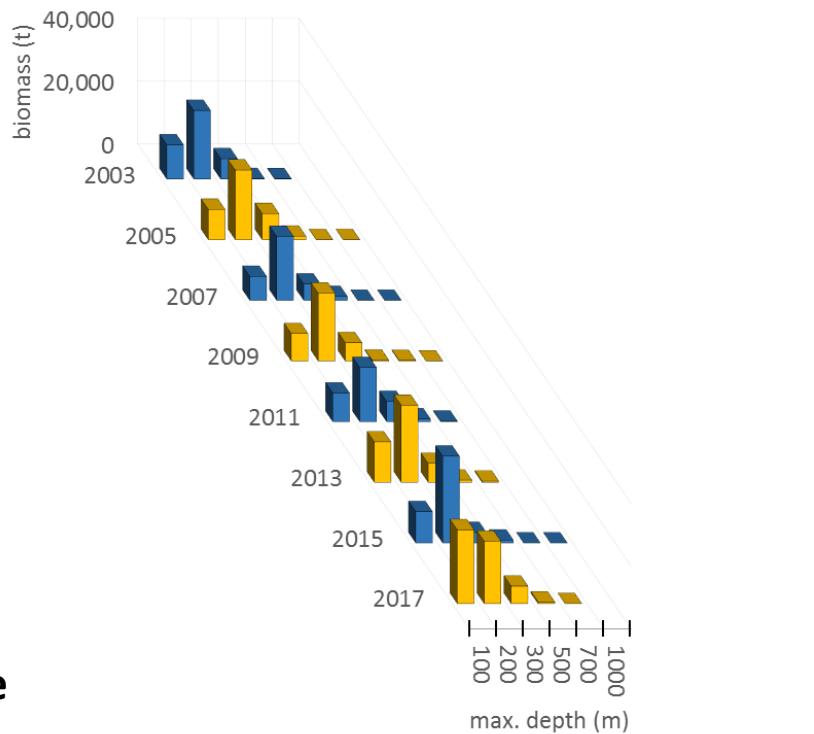

# skate distribution by depth
